Tallika Corporation Joins ARM Connected Community

Mesa, Arizona – March 15, 2006 – Tallika Corporation today announced it is a new member in the ARM® Connected Community. As part of the ARM Connected Community, Tallika Corporation will gain access to a full range of resources to help it market and deploy innovative solutions that will enable developers to get their ARM Powered® products to market faster.

“We are pleased to join the ARM Connected Community Program. Our team has years of very successful experience architecting, designing and developing solutions around embedded ARM processors. Our design services from our design centers in Phoenix, Arizona and Chennai, India, when combined with our portfolio of silicon proven IP cores and our system level expertise in ARM processor-based SoC’s, offer ARM users a compelling one-stop resource for their SoC design needs”, said Hemi Bhatnagar, President & CEO of Tallika Corporation.

Tallika offers the world’s highest performing silicon proven Inline IPSEC Packet Processing Security IP with a very low gate count. Tallika’s IP portfolio also includes DDR I/II Controllers and PCI-SIG Compliant PCI Express Endpoint Controller cores which have proven compatibility with ARM’s PCI Express PHY.

The ARM Connected Community is a global network of companies aligned to provide a complete solution, from design to manufacture and end use, for products based on the ARM architecture. ARM offers a variety of resources to Community members, including promotional programs and peer-networking opportunities that enable a variety of ARM Partners to come together to provide end-to-end customer solutions.

The ARM Connected Community also enables Tallika Corporation to utilize the ARM Connected Community logo, which is an easy way for customers to recognize that Tallika Corporation has proven their commitment and expertise in support of the ARM architecture.

“By joining the ARM Connected Community, which now comprises more than 300 companies, Tallika Corporation increases the large portfolio of skills, products and services that are centered around the ARM architecture, and currently available to developers worldwide,” said Ian Thornton, Director of Solutions Marketing for ARM.
