Tallika and Intoto Collaborate on Integrated Security for Next-Generation Security Semiconductor Solutions

Mesa, AZ and Santa Clara, Calif., March 8, 2006 – Tallika Corporation, a semiconductor intellectual property and design services company, and Intoto, a leading provider of network-centric secure gateway software for networking and communications Original Equipment Manufacturers (OEMs), today announced a partnership to support each other's advanced security products. As part of this collaboration, customers integrating Tallika's IPsec security IP will be able to leverage Intoto's market-leading iGateway security software in bringing next-generation networking and communication products to market.

"Tallika's team has a long demonstrable track record in providing world-class security semiconductor solutions. We are excited to support Tallika's silicon-proven inline IPsec core with our broad range of iGateway security software products," said Doug Makishima, vice president of marketing at Intoto.

"We are delighted to work with Intoto in offering this complete solution to our customers. Intoto has developed market leading security solutions and this partnership will benefit our customers in bringing their products to market faster", said Hemi Bhatnagar, president and CEO of Tallika Corporation.

At 2.7 Gbps AES-SHA1 performance with only 250K ASIC gates, Tallika's Configurable Inline IPsec Engine is the industry's highest performing lowest gate count full protocol offload IP Core for IPsec RFC 2401 with an Ethernet In/Ethernet Out interface.

Besides IPsec IP Core, Tallika's IP portfolio includes a range of silicon-proven IP cores such as PCI Express, crypto/hash engines, and DDR I/II controllers.

Tallika provides on-site and off-site semiconductor design, verification and implementation services from its design center in Mesa, Arizona and Chennai, India.

Intoto's iGateway software platforms enable OEMs to quickly bring integrated security appliances and converged business gateways to market. Integrated security appliances, such as UTM appliances, offer an assortment of security capabilities in a single box including firewall/VPN, intrusion detection and prevention, and anti-virus. Next-generation products will also include content filtering, anti-spam, and anti-spyware.

About Intoto

Intoto is the leading software Original Design Manufacturer (ODM) of network-centric security software platforms, with integrated security, voice and wireless technologies, to networking and communications Original Equipment Manufacturers (OEMs). Intoto has more than 100 designs with high-volume global OEMs and boasts in excess of two million installations of its technology in U.S., European and Asia-Pacific markets. Intoto's complete, integrated software platforms, which support all major hardware platforms and operating systems, enable OEMs to reduce development costs and speed time-to-market for faster return on investment and increased market share. Founded in 1998, Intoto is headquartered in Santa Clara, Calif. More information is available at <http://www.intoto.com> or by calling +1 (408) 844-0488.

About Tallika Corporation

Tallika Corporation is a leading provider of Silicon Intellectual Property and Professional Design Services for consumer, networking, computing, and storage markets. Tallika provides design services from its Design Centers in Chennai (near Bangalore), India and Phoenix, Arizona. Tallika's IP Portfolio includes PCI Express Controllers, Security Solutions and DDR I/II Controllers. Tallika's design services include turn-key Specification to GDSII – Specification, RTL, Verification, and RTL-to-GDSII – for digital and mixed-signal designs. Tallika specializes in design services for system level enablement PCI Express and Security technologies for its Customers.
