Tallika announces customer success with ServerEngines, LLC

Mesa, Az, USA, Nov 1, 2007 — Tallika Corporation, a Semiconductor Intellectual Property and Design Services Company, disclosed today that its engineering team provided a broad array of ASIC Design Services for the recently announced 10Gb Enterprise IO Controller BladeEngine™ product from the high profile startup ServerEngines, LLC.

“Tallika’s team provided a broad range of SOC timing closure design services while working with our team and our foundry partner. We are extremely pleased to have Tallika’s team work alongside our team and contribute to the first-silicon success of our very challenging Product Development effort. During our engagement, Tallika provided us with outstanding support and design services, and we would be happy to re-engage with them in future”, said Jay Avula, Vice President, Technology and Founder of ServerEngines, LLC.

“We are delighted and honored to be able to work alongside ServerEngines’ world-class engineering team and contribute to their success. ServerEngines’ team has a long and very successful track record of delivering first time working silicon for Enterprise class high-end servers. Exceeding ServerEngines’ rigorous performance and quality standards and meeting their highly selective selection/qualification requirements demonstrates our organization’s capabilities and the quality of our IP”, said Neel Das, Vice President, Professional Services of Tallika Corporation. “With our India Design Center, we are able to offer high quality Design Services at very attractive price points”, he added.

About Tallika Corporation:
